home network via different protocol standards, comprising:  
simultaneously displaying generated icons of the network devices having a plurality of functions regarding a reproducing and/or recording of an audio/video signal, icons of a plurality of services provided by each device grouped according to the type of services provided, and menus including the functions which are operable with/by the associated network device/service; at least partially displaying the generated icons with a hierarchical structure so as to show a relationship of network connections of the network devices in the home network;  
receiving a selection of a network device or service by a user selecting one of the displayed icons;  
selectively displaying the menu of a selected network device or service, the menu including the functions which are operable with the selected network device/service;  
receiving a selection of a function in the selectively displayed menu;  
controlling the network device or service to execute the selected function based on a respective one of the protocol standards, wherein the execution of the selected function results in a data stream of an audio/video signal stored in a providing network device being sent from the providing network device to the selected network device or to a device capable of receiving said data stream via the home network; and  
receiving a user selection resulting from a dragging of one of the displayed icons of the plurality of services provided by corresponding network device and a dropping of the icon on an icon of another network device to perform the service corresponding to the dragged and dropped icon on the another network device.-;

- Claim 17 The method according to claim 16, wherein said network devices include all compatible devices that are connected to the home network.--;
- Claim 18 The method according to claim 16, wherein said home network, further includes one or more sub-networks integrated into said home network via a bridge.--;
- Claim 19 The method according to claim 18, wherein at least partially displaying the icons with a hierarchical structure further includes organizing the icons according to the kind of sub-networks connected to said network.--;
- Claim 20 The method according to claim 16, wherein the selected function in the displayed menu is a "send to" function.--;
- Claim 21 The method according to claim 16, further comprising selecting a providing network device.--;
- Claim 22 The method according to claim 21, further comprising selecting an audio/video signal stored on the selected providing network device.--.
